

DINESH BABU

Senior Scrum Master | Agile Delivery | Project Governance Lead | 14+ Years Experience

Mobile: [+91-9885935789] | Email: [dineshbabu.smpm@gmail.com] | Hyderabad, Telangana |
LinkedIn: [https://www.linkedin.com/in/dinesh-babu-link]

Tools & Technologies

Agile/PM Tools:

JIRA, JIRA Align, Azure DevOps
Rally, Confluence, Trello
Monday.com, ServiceNow

Collaboration:

MS Teams, Slack, Zoom
Miro, Mural, SharePoint

Dashboards & Reporting:

Power BI, Jira Reports
Excel (Advanced/VBA)
MSP

DevOps & CI/CD (Awareness):

Estimation & Retro:

Planning Poker, TeamRetro
EasyRetro, Metro Retro

Core Competencies

- Agile & Scrum Delivery
- SAFe 6.0 / LeSS / Kanban
- Scrum Ceremonies Facilitation
- Servant Leadership & Coaching
- Backlog Mgmt & Prioritization
- MoSCoW / Kano / Stack Ranking
- Velocity & Burndown Analytics
- DOR / DOD / Acceptance Criteria
- RAID Log Management
- Impediment Removal
- Release & Capacity Planning
- Stakeholder Engagement
- CI/CD & DevOps Awareness
- Continuous Improvement
- AI-enabled SDLC Practices
- GenAI Tool Adoption
- Cross-functional Leadership
- Executive Reporting & Governance

Certifications

- Certified scrum master
- PMP
- Power BI (PL-300)
- MSP
- Alteryx

Education

Bachelor of Commerce

Languages

- English (Professional Fluency)
- Hindi
- Telugu

Professional Summary

Certified Scrum Master with 14 + years of overall experience and around 5 years in driving Agile transformations, leading cross functional teams, and delivering complex IT projects using Scrum, SAFe, and Kanban frameworks. Proven expertise in facilitating Agile ceremonies, managing dependencies, fostering continuous improvement, and enhancing team performance through coaching and mentoring. Proficient in Jira, Confluence, Power BI, and Azure DevOps, optimizing workflows for maximum efficiency. Strong communication, stakeholder engagement, and risk management abilities. Focused on coaching teams and implementing Agile frameworks to improve workflow efficiency and deliver high-quality products.

Key Achievements

- Helped 3 Agile teams achieve stable velocity within 6–8 sprints, reducing sprint variance from 35% to under 10%.
- Delivered 90%+ sprint commitment fulfillment rate consistently over 12 consecutive sprints across two enterprise programs.
- Reduced time-to-market by 20% through process optimization, dependency management, and proactive impediment removal.
- Built JIRA/Power BI dashboards that cut leadership reporting time by 2 hours per sprint and improved delivery transparency.
- Introduced AI-enabled sprint planning tools; improved story estimation accuracy by ~20%, reducing planning ceremony duration by 30 minutes per sprint.
- Cross-skilled 50%+ of team members across 3 delivery engagements, reducing bus-factor risk and improving team adaptability.

Work Experience

Senior Scrum Master | Assistant manager

[KPMG- Hyderabad]

[Feb 2024] – Present

- Facilitated all Scrum ceremonies (Sprint Planning, Daily Stand-ups, Reviews, Retrospectives) for 2–3 concurrent cross-functional Agile teams; sustained 90%+ sprint completion rate over 18+ months.
- Owned and optimized JIRA boards, workflows, dashboards, and reports; provided real-time sprint progress visibility, velocity trends, and release milestone tracking to senior stakeholders.
- Collaborated with Product Owners on backlog refinement, user story creation (3W/INVEST/SMART/GWT), acceptance criteria definition, and DOR/DOD compliance; ensured MoSCoW adherence at sprint level.
- Proactively identified, tracked, and resolved team impediments; maintained RAID logs and escalated systemic risks to program leadership, shielding teams from external interference.
- Drove Agile maturity coaching: trained 15+ team members on Scrum/Kanban/XP; achieved team stable velocity within 6 sprints ($\pm 10\%$ variation) and cross-skilled 50%+ of team members.
- Built executive dashboards in Power BI and JIRA: velocity, burndown, capacity planned vs. actual, cycle time, and sprint commitment vs. delivered; reduced reporting overhead by 30%.
- Led Scrum of Scrums; managed cross-team dependencies across development, QA, DevOps, and business stakeholders; ensured seamless delivery across parallel workflows.
- Championed SAFe PI Planning, ART sync, and Inspect & Adapt workshops; collaborated with RTE to maintain program-level delivery health across quarterly increments.
- Ran retrospection actions ownership, CoP sessions, and Kaizen-based improvement cycles; improved sprint predictability by 25% quarter-over-quarter.
- Introduced AI-enabled Agile tools and automation: reduced sprint planning time by 20% and improved estimation accuracy through AI-assisted story point analysis.

Scrum Master | Technical Project Management

[Hitachi Vantara - Hyderabad]

[Dec 2019] – [Feb 2024]

- Facilitated all core Scrum ceremonies (Sprint Planning, Daily Stand-ups, Sprint Reviews, Retrospectives) for two Agile teams, improving ceremony effectiveness by 30%.
- Ensured 90%+ sprint goal achievement by implementing effective backlog grooming sessions with the Product Owner, aligning team deliverables to business priorities.
- Removed over 10 recurring impediments per quarter, including cross-team blockers and third party integration delays, leading to a 15% increase in team velocity over 6 months.
- Introduced and tracked Agile metrics such as sprint burn-down, velocity, cycle time, and commitment reliability, using Jira dashboards for improved transparency and decisionmaking.
- Actively coached and mentored team members in Scrum, Kanban, and SAFe practices, contributing to a 30% Agile maturity uplift within the department.

- Collaborated closely with Product Managers, Architects, QA, and Release Managers to manage dependencies, ensure quality deliverables, and uphold Definition of Done (DoD).
- Maintained sprint boards, workflow automation, and reporting using Jira and Confluence; improved data traceability and audit readiness.
- Supported DevOps integration efforts, improving CI/CD pipeline efficiency by reducing build times by 25% and deployment rollbacks by 10%.
- Built the project cost baseline from resource effort estimates and managed cost performance through phased rollouts, disciplined sprint planning, and optimized resource use.

Project Management Lead/Senior Analyst

[Accenture - Hyderabad]

[July 2015] – [Dec 2019]

- Owned and maintained the full PMO Trilogy across multiple concurrent programmes: RAID Log (Risks, Assumptions, Issues, Dependencies) in JIRA/Confluence — ensuring weekly Steering Committee reporting, escalation SLAs, and resolution tracking with zero overdue critical risks.
- Managed end-to-end Risk Management lifecycle: risk identification, probability-impact scoring, mitigation planning, owner assignment, and formal closure; maintained live Risk Register with RAG status updates published to senior stakeholders and governance forums.
- Led Defect Tracking and Incident Management operations in ServiceNow — triage, priority classification, SLA breach alerts, root cause analysis, and closure validation; achieved consistent SLA compliance across Incident, Problem, and Change Management tracks.
- Performed predictive analysis on incident trends and resource data to forecast future volumes, scope changes, and capacity gaps; created hourly, daily, weekly, and monthly incident metric dashboards covering open/closed analysis, SLA adherence, Problem ticket conversion, and resource utilisation.
- Built Power BI dashboards replacing manual Excel status decks — covering sprint/programme velocity, RAID status, financial variance (actuals vs. planned), resource utilisation heatmaps, and SLA compliance — providing real-time programme visibility to leadership.
- Designed Alteryx automation workflows to aggregate PMO data from ServiceNow, PPM tools, and finance systems; standardised report inputs across all workstreams and reduced weekly manual reporting effort by ~55%.
- Drove process standardisation across PMO: authored runbooks, SOP templates, and governance playbooks; groomed and mentored 4 junior PMO analysts, reviewing their outputs and ensuring adherence to PMO standards.

Associate Projects - PMO

[Cognizant - Hyderabad]

[April 2010] – [July 2015]

- Managed end-to-end account invoicing, billing, and revenue recognition for \$250M+ accounts; conducted profit analysis and led margin improvement initiatives.
- Reconciled invoices, chargebacks, and payments; tracked billable/non-billable activities, PO run rates, and RAM costing via MIS reports and timesheet compliance analysis.
- Led accounts receivable management, prepared financial forecasts, and submitted weekly reports covering invoicing, ageing, adjustments, and accruals.
- Interfaced with clients for business requirements gathering, system analysis, and finalisation of technical/functional specifications and high-level design documents.
- Collaborated with leadership on global resource forecasting and supported audits, reconciliations, and client documentation.

Agile Knowledge Snapshot

Scrum Framework: 3-5-3 (3 roles, 5 events, 3 artifacts); all ceremonies, accountabilities, and Scrum values

User Stories: 3W format, INVEST criteria, SMART acceptance criteria, GWT (Given-When-Then)

Estimation: Fibonacci sequence, Planning Poker, T-shirt sizing, story point calibration

Prioritization: MoSCoW, Kano Model, Stack Ranking, Value vs. Effort matrix

Kanban: WIP limits, Pull system, flow metrics: Lead Time, Cycle Time, Throughput, CFDs

Scaling: SAgile 6.0 (ART, PI Planning, RTE, Scrum of Scrums), LeSS, Nexus

Metrics: Velocity, Burndown/Burnup charts, Capacity Planning, Predictability Index

Release Mgmt: Release calendar, CCB structure, code freeze, deployment governance, release trains

RAID Framework: Risks, Assumptions, Issues, Impediments, Dependencies – tracking & mitigation

AI / GenAI: AI-enabled Agile tools, GenAI-assisted sprint planning, SDLC automation, AI adoption coaching
